1. A confined space can be as large as a tank, vessel or silo. True or False
2. A confined space always requires a permit to be entered. True or False
3. Employers must warn employees of the existence and location of permit required confined spaces via emails and word of mouth. True or False
4. Employers must have a written program to cover permit required confined space entry. True or False
5. Training is required for all employees working in/with PRCSs. True or False
6. Entry supervisors must verify all test, including atmospheric test, are conducted before entry into a PRCS is allowed. True or False
7. Attendants must maintain constant contact with entrants. True or False
8. Attendants should always attempt to rescue entrants when a hazardous situation occurs. True or False
9. At least one member of the rescue team must be certified in basic first aid and CPR. True or False
10. Trained rescue workers should enter confined spaces only when absolutely necessary. True or False
11. Confined space atmospheres must be tested for five different hazardous atmospheres. True or False
12. Oxygen content must be between 19.5% and 23.5%. True or False
13. The use of continuous forced-air ventilation can be used to eliminate potential and actual atmospheric hazards. True or False
14. Entrants could ‘drown’ in a confined space filled with grain. True or False
15. Entrapment can occur in a PRCS due to the shape or design of the space. True or False
16. Some PRCS risks include electrical hazards, moving machinery, stored energy, heat and falls. True or False
17. Lockout and PPE should be used when appropriate for employee safety in PRCSs. True or False
18. A permit to enter a confined space is good for up to one year from being implemented. True or False
19. All PRCS permits must be reviewed within one year of the permit entry date. True or False
20. When working with outside contractors, the 'host' employer and outside contractor should coordinate entry operations to ensure the safety of all employees. True or False

I understand the information contained in this training program and have passed the quiz regarding Confined Space Safety.

Printed Name          Signature          Date
1. A confined space can be as large as a tank, vessel or silo. True
2. A confined space always requires a permit to be entered. False
3. Employers must warn employees of the existence and location of permit required confined spaces via emails and word of mouth. False
4. Employers must have a written program to cover permit required confined space entry. True
5. Training is required for all employees working in/with PRCSs. True
6. Entry supervisors must verify all test, including atmospheric test, are conducted before entry into a PRCS is allowed. True
7. Attendants must maintain constant contact with entrants. True
8. Attendants should always attempt to rescue entrants when a hazardous situation occurs. False
9. At least one member of the rescue team must be certified in basic first aid and CPR. True
10. Trained rescue workers should enter confined spaces only when absolutely necessary. True
11. Confined space atmospheres must be tested for five different hazardous atmospheres. False
12. Oxygen content must be between 19.5% and 23.5%. True
13. The use of continuous forced-air ventilation can be used to eliminate potential and actual atmospheric hazards. True
14. Entrants could 'drown' in a confined space filled with grain. True
15. Entrapment can occur in a PRCS due to the shape or design of the space. True
16. Some PRCS risks include electrical hazards, moving machinery, stored energy, heat and falls. True
17. Lockout and PPE should be used when appropriate for employee safety in PRCSs. True
18. A permit to enter a confined space is good for up to one year from being implemented. False
19. All PRCS permits must be reviewed within one year of the permit entry date. True
20. When working with outside contractors, the 'host' employer and outside contractor should coordinate entry operations to ensure the safety of all employees. True
