1. Any unsafe working condition or tool should be reported immediately to your supervisor. True or False
2. Tools should be kept in good working condition through regular maintenance. True or False
3. If a tool is damaged, you should try to repair it yourself before taking it back to the manufacturer. True or False
4. It is OK to use a large wrench to drive a small nail if you do not have a hammer readily available. True or False
5. Floors and work areas should be kept clean and dry to prevent accidents. True or False
6. Personal protective equipment is vital to the safety of employees that work with hand and power tools. True or False
7. Employees have a responsibility to use PPE properly and when required. True or False
8. Belts, gears, shafts, pulleys, or other reciprocating, rotating or moving parts of equipment must be guarded if they are exposed to contact by employees. True or False
9. It is permissible to remove safe guards temporarily when working in a tight area. True or False
10. Hand-held power tools such as chain saws and percussion tools without means to securely hold accessories must be equipped with a constant-pressure switch. True or False
11. The greatest hazards posed by hand tools are a result of misuse and improper maintenance. True or False
12. Dull blades are more dangerous than sharp blades. True or False
13. The best way to carry a power tool is in its case or by the cord if you do not have a case. True or False
14. When carrying an energized tool keep your finger on the power switch. True or False
15. Ground Fault Circuit Interrupters should always be used at construction sites. True or False
16. You should never point compressed air guns towards anyone. True or False
17. Only specially trained employees should operate powder-actuated tools. True or False
18. You should never stand in the plane of rotation of an abrasive wheel and always turn off the power supply when not in use. True or False
19. On jacks, the manufacturer’s load limits must be permanently marked in a prominent place and should never be exceeded. True or False
20. If you have an accident, even if the injury is minor, report it and let trained medical professionals determine the proper care. True or False

I understand the information contained in this training program and have passed the quiz regarding Hand and Power Tool Safety.
